- Take your time eating. Chew very well and take small bites of food.
- For the first two days, take in liquids only and drink at least 1 Liter per day. (Soup, protein shakes, juices, etc.).
- For the first 4 weeks, take in a soft diet with moist foods.
- Avoid tough/sticky foods – pancakes, steak, fresh doughy breads or rolls, and abrasive foods. Well-toasted breads are generally well tolerated.
- Prevent aerophagia (gas bloating) by avoiding the use of straws, slurping foods, chewing gum, sucking on candy or ice cubes, and drinking carbonated beverages. Chew with mouth closed.
- Sit upright when eating. Remain in a sitting position for 45-60 minutes after eating. Avoid eating 3 hours before bedtime.
- Avoid dehydration by drinking plenty of fluids with and between meals (at least 1 Liter per day).
- Stop eating when starting to feel full or bloated.
